

RF DigiMax 210

*Ease of
installation*

Product number : Digimax 210

Key Features

- No wires to install.
- Ideal for combi-boilers.
- X10 compatible.

Benefits

Because it is wireless, the RF DigiMax 210 is very easy to install.

Install the RF receiver near the boiler or a/c unit and connect the relay output to the control circuit of the unit. Fix the RF DigiMax 210 in the optimal location and that's it!

If you have a combi-boiler with a programmer, the RF DigiMax is the ideal controller for enhancing comfort and energy savings at home.

For added benefit, the RF DigiMax 210 can be integrated into X10's Home Automation system through the Home Automation controller SC9000.

Technical data

- Size : 80 x 80 x 25 mm
- Operating temps range : 5°C to 35° C in 1° steps
- With hypothermic link : 16° C to 35° C
- Differential : <1° C at 4° C per hour
- Ambient temp range : 0° C to 45° C
- Power supply : 3 type AA/5V
- Battery Life : 2 years typical
- Relay : 2 (1) A 24V-230 VAC
- RF Frequency : 433.92 MHz
- RF range : 40 metres (free air)
- Approval : EN300220-1, ETS300683, CE (R&TTE)
