

# Media Center Edition Remote Control

## Key Features

- Control your PC remotely from up to 10 meters away.
- Works with Windows MediaCenter Edition.
- Easy navigation keys.
- Plays your MP3, video files and DVD at the touch of a button and control their functions easily.
- Control your TV and radio channels on PC.
- Watch your photos on PC.

## Benefits

Imagine your PC in control, up to 10 meters away, using a unique wireless remote control! Thanks to the MCE remote control you can now directly access to the DVD drive of your PC, for example, in the same easy way as your do for your CD player.

- With Live TV, DVD menu and Record TV, mode keys, you can launch your different players at the touch of a button and navigate in their specific menu thanks to the navigation keys. Control your digital TV on PC the same way as you do with your normal TV
- The MCE remote control is compatible with Windows MediaCenter Edition, so that you can organise all your "multimedia files" just as you want. Just select your downloaded audio & video files with a simple key press. Even control your web browser and access your favourite web pages, or navigate in any other PC application.

*RF Remote Control  
2 designs available*

**Product number : OR23/22E & CM23E**

## Specifications

### Technical data:

#### Remote Control OR22E:

- Frequency : 433.92 MHz
- RF output: <10mW
- RF Range: 10m free field
- 2xAAA Batteries
- Size: 190 x 60 x 20 mm

#### Receiver CM23E:

- Frequency: 433.92MHz
- Operating voltage: USB + 5V
- Operating current: ≤20mA
- S3 standby mode current: ≤1mA
- Sensitivity: ≈-102dBm
- Size: 60 x 24 x 10 mm

### Approvals:

- CE Mark
- Radio : EN 300 200-3
- EMC : EN 301 489-3
