

Powermid Plus

Remote Control Extender and 6-in-1 Universal Remote Control with RF

Product number : RE10E

Key Features

- Control of your digital satellite receiver remotely.
- Comprehensive library includes codes for most TVs, SATs, DVDs, VCRs.
- Easy to setup - just look up the code for the TV, SAT, DVD, VCR and enter it into the remote using a simple key sequence.

Benefits

Many homes today have been pre-wired with coaxial cables to distribute the Audio/Video signal. But you still need to send the IR control codes.

Powermid Plus sends the IR codes by RF and provides a much needed universal remote control.

Universal IR/RF remote controllers contain a library of codes to match most of the TV, Video, cable, DVD and SAT components currently available on the market.

Room-to-Room Control

With the RF circuitry, the remote is used together with an IR extender to allow audiovisual components such as a SAT receiver to be controlled from any room in the home.

Simply plug-in and it works !

Components

6 in 1 Remote Control :

- Batteries: 2 x AAA
- RF Frequency: 433.92 MHz
- RF Operating Range: 30m (open field)
