

Wireless Wall Switch

product number : SS13E

Key Features

- New slim elegant design.
- Lets you control three X10 modules in your home with ON /OFF / BRIGHT / DIM.
- Sends wireless RF signals to the transceiver module TM13E or to any X10 wireless security system.
- Compatible with the full range of X10 home automation products

Benefits

The slimline wireless wall switch (SS13E) lets you control three modules from any where in your home.

The SS13E is normally used with the TM13E transceiver which passes through all codes from the wireless wall switch onto the powerline to control X10 modules. You can also use the wireless wall switch with any X10 security system instead of the TM13E.

Typical applications

- Use the wireless wall switch anywhere you want to control a device that does not have a wall switch.
- Place one on the wall near your bedside.
- Place one near your entrance.
- Use them with the universal computer interface CM11E to provide "Virtual Wiring" (macros).
- Control all your table lamps in the living room from one location.

Technical data

- Batteries: 1CR 2032,3 V lithium
- RF frequency: 433.92 MHz
- Radiated output: < 1mW
- RF operating range: 30 m (open field)
- Approvals: ETS 300220,300683
- CE Mark, R&TTE
- Ambient temperature:
 - 10°C to + 50°C (operation)
 - 20°C to + 70°C (storage)
