

*with remote control (433 MHz)  
and integrated amplifier*

**Product number : VK50SE**

## Benefits

### "Power of the PC on any TV":

A PC monitor is not the greatest screen for experiencing the crisp images of DVD. Nor can you enjoy the full impact of digital sound. But your TV is designed specifically for comfortable high quality viewing and listening. The problem is your TV and your PC are not in same room. So how do you get the PC image onto the TV ?

With the PC cable (supplied) plugged into either the video output of your graphics card and the audio jack plugged into the phono output of your sound board, as simple as that. The other end of the cable is plugged into X10's 2.4GHz transmitter. At your TV, the X10 receiver cable is plugged into an input SCART or RCA jack.

## Components

- A/V Transmitter Unit
- A/V Receiver Unit.
- Cables.

## Key Features

- Transmits PC screen images to your big TV screen - your favourite DVD or Video CD.
- With X10 PC remote control, you can control your PC from your viewer's armchair

## Technical details

### Video Sender

- AC power supply : 220VAC/50 Hz
- Approvals :
  - EN 300 440-3
  - EN 301 489-3
  - CE Mark
- Channels : 4

### Transmitter

- RF output : 50,000  $\mu$ V/m @ 3m
- Modulation method : FM Video/Audio
- Video input level : 1 v p-p (typ)
- Audio input level : 1 v p-p (typ)
- Video input impedance : 75 ohms
- Audio input impedance : 600 ohms
- Audio bandwidth : 20 - 18000 Hz
- RF range : 40 m (open field)

### Receiver

- Video output level : 1 v p-p (typ)
- Audio output level : 1 v p-p (typ)
